

Enterprise Asset Management (EAMS) v15

Asset Acquisitions

End User Documentation

Update 10/22/2024

Asset Acquisitions

MaintStar is a complete Asset Management system that tracks and manages an asset's life from birth to retirement. Having this complete record of an asset allows administrators to perform appropriate maintenance, gain awareness of an asset's condition and perform capacity planning for life and replacement.

The Asset Acquisition tool allows administrators to enter and track asset(s) data at birth and assign an associated acquisition record. This can be particularly helpful for vehicles, equipment or other vertical assets. While assets can always be created manually in the Asset screens, the Acquisition tool provides a simple interface for completing bulk asset entry when associated with a purchase/procurement effort (for instance when replacing Fleet vehicles under a single contract).

Acquisition Tool

The Acquisition Tool can be found under Assets > Asset Acquisitions.

The screenshot displays the MAINTSTAR Acquisition tool interface. On the left is a navigation menu with options like Home (admin), Work Order, Work Request, Asset, Asset Type, Asset Group, Warranties, Barcode, Asset Claim, Lease, Acquisition, Disposal, Registry, Reports, Asset Lifecycle, Inventory, Reporting, Work Planning, Purchase Orders, Invoicing, Fleet, Setup, and FLEET. The main area shows a table of acquisition records with columns for Acq Number, Status, and Year. Below the table is a detailed form for 'Acquisition: 2024-00004'. The form includes fields for Acq No (2024-00004), Status (Done), Title (2024 Fleet Refresh), Description, Budget Amount (50000.00), Model Year, Model, Customer, Acq Approved By, Purchase Type, Workgroup (FACIL), Make, Date Created, Date Approved, Contact, and Bid Open. There are also buttons for 'New Acquisition', 'Save', and 'Active'.

Acq Number	Status	Year
2024-00004	Done	
2024-00003	Approved	
2024-00002		
2024-00001	Approved	
2023-00004		
2023-00003		
2023-00002	Approved	
2023-00001	Done	
2022-00002		
2022-00001

Details

- This page contains the Acquisition Record details

Bids

- Contains a record of bid submissions, for reference purposes

Asset Birth Certificate

- Listing of Associated assets to the record
- Existing or New Assets can be associated

Attachments

- Contains Acquisition record attachments (contracts, invoices, etc)

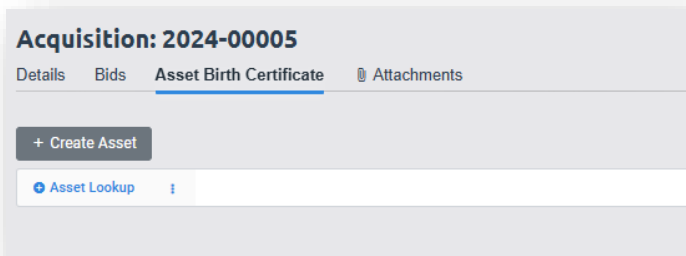

Creating a New Acquisition Record

Details Page

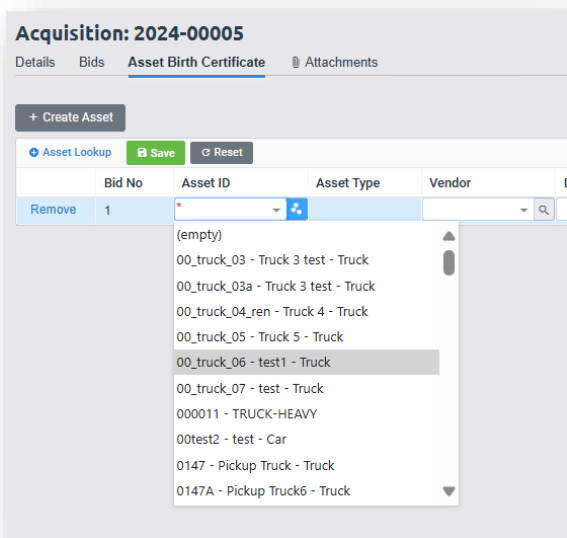

1. To create a New Acquisition Record, simply click "New Acquisition". Complete the details as needed, although very little information is required. This information is purely for informational purposes only.

Asset Birth Certificate

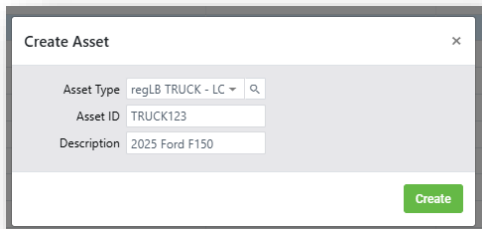

- 2. Click on Asset Birth Certificate

- 3. To add an EXISTING asset, click on Asset Lookup
- 4. From here an asset can be typed in OR the lookup and filter tool can be used

- 5. To Create an Asset from the screen, click "Create Asset".
Creating an Asset from this screen will add an Asset to the Asset List
- 6. When an Asset is created, a dialog box will appear asking for Asset Type, ID and Description

- 7. Enter information, click Create.

8. As each Asset is created on the Record, information can be populated on the Asset Detail page. Much of this information will be sent to the Asset record, thereby simplifying data entry.

This transfer can only be completed ONCE per Asset

Acquisition: 2024-00005

Asset Lookup

Bid No	Asset ID	Asset Type	Vendor	Description	In Service Date	Purchase Price	Purchase Date	Warranty Start Date	Serial No.
1	TRUCK123	regLB TRUCK	ACS	Ford F150					

Acq No: 2024-00005 Bid No: 1 Asset ID: TRUCK123 Asset Type: regLB TRUCK Description: Ford F150 Vendor: ACS - AIRCO COM Purchase Price: In Service Date: Warranty End Date: Serial No: Notes:

Vehicle/Equipment Information

VIN: 123456123456123456 Model Year: 2025 Make: Ford Model: F150 License No: ABC1234 Meter Reading: 0 Color: Brown

Save Transfer to Asset

9. Data that can be transferred to the Asset includes:

- Description
- Install Date
- VIN
- Make
- Model
- Year
- License Number
- Color
- Meter

10. Once data is entered (this process is based on individual assets), click Save

11. To Transfer the Data, click "Transfer to Asset".

12. A warning message will appear, ensure this message is understood, then click OK.

13. Associated Data will transfer.

14. For future updates, the Asset must be updated (not the Acquisition Record)
